Course CPM lesson 3.1.2 Exit Slip

**Concept for the lesson:** Students will use models to multiply with fractions, and develop the standard algorithm for multiplication of fractions.

**Standard:** Preparation for 6.NS.L Interpret and compute quotients of fractions, and solve word problems involving division of fractions by fractions, e.g., by using visual fraction models and equations to represent the problem.

**Questions**

1. Determine the product. Draw a model to represent your thinking.

$$\frac{2}{5} \times \frac{3}{8}$$

2. Chris has  $\frac{2}{5}$  of a quart of juice left in the container. He pours  $\frac{3}{5}$  of the juice in his sister's glass.

- a. Draw a diagram that represents the amount of juice in Chris' container.

- b. After pouring the juice in his sister's glass, is there more juice in the container or more juice in his sister's glass?

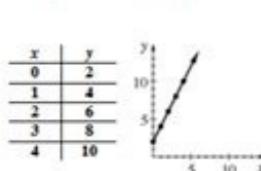

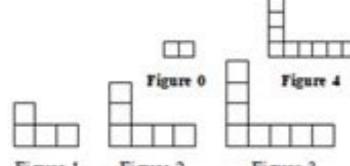

3.2.2 Solving Equations and Checking Solutions

Homework

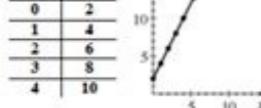

Name \_\_\_\_\_ Period \_\_\_\_\_

3-84. Draw Figure 0 and Figure 4 for the pattern below.

- a. Represent the number of tiles in each figure with an  $x \rightarrow y$  table, an algebraic rule, and a graph.  
Rule:  $y = 2x + 2$

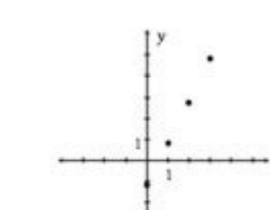

- b. Without drawing Figure 5, predict where its point would lie on the graph. Justify your prediction.

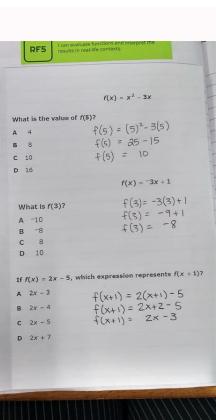

3-85. Examine the graph at right.

- a. Use the graph to complete the table:
- |         |    |    |   |   |   |
|---------|----|----|---|---|---|
| IN (x)  | -1 | 0  | 1 | 2 | 3 |
| OUT (y) | -3 | -1 | 1 | 3 | 5 |

- b. Use the graph to find the rule:

$$y = 2x + 1$$

Cpm algebra connections answer key. Cpm core connections course 1 answer key.

Mathleaks offers the ultimate homework help and much of the content is free to use. Browse the textbooks below or by downloading the Mathleaks app for free on Google Play or the App Store. Browse your textbook to find expert solutions, hints, and answers for all exercises. The solutions are always presented as a clear and concise, step-by-step explanation with included theory and helpful figures, graphs, and diagrams. Mathleaks covers the most commonly adopted textbooks with more than 250000 expert solutions. Mathleaks Solver With Mathleaks, you're not tied to your textbook for solutions. Instead, scan and solve exercises with our math solver, which instantly reads the problem by using the camera on your smartphone or tablet. Access the solver through the Mathleaks app or on our website. The Mathleaks solver works for Pre-Algebra, Algebra 1, and Algebra 2. Mathleaks Community Get the first course in a five-year sequence of college preparatory mathematics courses that starts with Algebra 1 and continues through Calculus. It aims to deepen and extend student understanding built in previous courses by focusing on developing fluency with solving linear equations, inequalities, and systems. These skills are extended to solving quadratic equations, exploring linear, quadratic, and exponential functions graphically, numerically, symbolically, as sequences, and by using regression techniques. Students analyze the fit of models to distributions of data. Read more about Core Connections Algebra. Core Connections Algebra Book Cover The Core Connections courses are built on rich, meaningful problem situations that develop deep conceptual understanding of the mathematics and establish connections among different concepts. Each lesson problem is non-routine and open-worthy, requiring students to problem-solve and collaborate throughout the problem. Students are encouraged to justify their reasoning, communicate their thinking, and generalize their results. Read more about the lesson structure. Chapters are divided into sections that are organized around core topics. Within each section, lessons include activities, challenging problems, investigations, and practice problems. Teacher notes for each lesson include a "suggested lesson activity" section for ideas for lesson introduction, specific tips and strategies for lesson implementation to clearly convey core ideas, and a means for bringing the lesson to closure. Read more about the course structure.
